

Electrical Maintenance / Projects Technician

Tiflex Limited (a leader in the field of Polymer Products) is seeking to recruit an enthusiastic Electrical Technician to compliment the existing Maintenance and Projects Team based in Liskeard, Cornwall.

The ideal candidate must have completed a recognised apprenticeship and have had several years experience in an industrial production environment working in the following areas:

Fault finding on all types of machinery control systems and PLC's

Motor drive systems, AC and DC up to 390kw

Electrical installation of machinery and services

Electrical testing, instrumentation and calibration

Hydraulic and Pneumatic control systems

Thorough working knowledge of the IEE and Electricity at Work Regulations.

Candidates must have a totally flexible working attitude, have confidence in their own ability and be willing at times to work overtime or unsociable hours.

The successful candidate will be required to work an alternating two shift system as detailed below:

Week 1	0600 – 1300	Monday to Thursday	
	0600 – 1500	Friday	(total 37 hours per week)

Week 2	1300 – 2215	Monday to Thursday	(total 37 hours per week)
--------	-------------	--------------------	---------------------------

Pay is dependent on experience; however all grades of pay attract a shift allowance of an additional £1.74 per hour.

Other benefits include:

Stakeholder Pension Scheme with Company contribution (subject to eligibility)

Company sick pay scheme

Generous holiday entitlement
